RESEARCH INTERESTS

AI Safety, Computational Social Science

My research interests lie in understanding how large language models behave throughout their reasoning processes, particularly how and why failures emerge. I am especially interested in safety failures, including how unsafe behaviors develop during reasoning and how these insights can inform methods for detecting and preventing them. I am also interested in how model behavior varies across languages, users, and social contexts, as well as the underlying factors that shape these differences.

EDUCATION

Seoul National University **Sep. 2023 ~ Feb. 2026**
M.S. in Data Science (Advisor: Prof. Taesup Kim) Seoul, South Korea

New York University **Sep. 2021 ~ Dec. 2021**
Exchange Student, College of Arts and Science New York, United States

Yonsei University **Mar. 2018 ~ Feb. 2023**
B.A. in Political Science and Diplomacy Seoul, South Korea

PUBLICATIONS (* : EQUAL CONTRIBUTION)

1. **TrASE: Trajectory-Aware Safety Evaluation for Large Reasoning Models**
   Hyunbin Jin*, Jungwhan Kim*
   Under Review
2. **Beyond Case Law: Evaluating Structure-Aware Retrieval and Safety in Statute-Centric Legal QA**
   Kyubyung Chae, Je Won Yeom, Jeongjae Park, Seunghyun Bae, Ijun Jang, Hyunbin Jin, Jinkwan Jang, Taesup Kim
   ACL 2026 Oral
3. **What If TSF: A Benchmark for Reframing Forecasting as Scenario-Guided Multimodal Forecasting**
   Jinkwan Jang*, Hyunbin Jin*, Hyungjin Park, Kyubyung Chae, Taesup Kim
   arXiv preprint
4. **From Threat to Tool: Leveraging Refusal-Aware Injection Attacks for Safety Alignment**
   Kyubyung Chae*, Hyunbin Jin*, Taesup Kim

   Technical Report, 2026

WORK EXPERIENCE

Residency Program, NAVER Cloud **Oct. 2025 ~ Jul. 2026**

- Constructed distillation-based synthetic SFT data to enhance reasoning, and designed a safety evaluation framework assessing LRM reasoning trajectories.

NLP Research Engineer, Twigfarm **Oct. 2022 ~ Feb. 2023**

- Developed an image-guided machine translation (IMT) pipeline for Korean–Japanese webtoon translation and constructed a parallel dataset for video-guided machine translation (VMT).

Data Analyst Intern, UpennSolution **Feb. 2021 ~ Jul. 2021**

- Conducted quantitative analysis on real-world data to extract insights into social phenomena.

RESEARCH PROJECTS

Clinical Information Extraction **Oct. 2025 ~ Feb. 2026**

Research Collaboration with Seoul National University Bundang Hospital

- Constructed an LLM-based pipeline that extracts and structures key clinical information from epilepsy patient notes, ensuring robustness to heterogeneous physician documentation styles.

Legal RAG System **Mar. 2025 ~ Aug. 2025**

Research Collaboration with Naedam C&C

- Constructed a legal retrieval corpus and an evaluation QA dataset for Korean fire safety law, and developed a domain-specific RAG system validated on this benchmark.

Face Blur Estimation **Jul. 2022 ~ Sep. 2022**

Research Collaboration with Alchera

- Developed and evaluated a regression model estimating blur levels in facial images to filter motion-blurred inputs for reliable face recognition.

PATENTS

Method and Apparatus for Adaptive Injection Decoding to Prevent Incomplete Reasoning in Large Language Models

Patent No. 10-2025-0165083, South Korea (Patent Pending)

AWARDS AND HONORS

Fellowships/Scholarships

Support for Next-Generation Researchers Program – Ministry of Education, South Korea 2024 ~ 2025

Merit-based Scholarship – Seoul National University 2024

Jilli Scholarship (Merit-based Scholarship) – Yonsei University 2018, 2020

Awards

Honors (Top 10% in the College of Social Science) – Yonsei University 2018, 2020
