RESEARCH INTERESTS

LLM Safety, Computational Social Science

My research interests lie in LLM safety, focusing on developing methods that enhance the trustworthiness of LLMs for real-world deployment. I am also interested in leveraging LLMs to address interdisciplinary challenges at the intersection of AI and the social sciences.

EDUCATION

Seoul National University

M.S. in Data Science (Advisor: Prof. Taesup Kim)

Sep. 2023 ~ Feb. 2026

Seoul, South Korea

New York University

Exchange Student, College of Arts and Science

Sep. 2021 ~ Dec. 2021

New York, United States

Yonsei University

B.A. in Political Science and Diplomacy

Mar. 2018 ~ Feb. 2023

Seoul, South Korea

PUBLICATIONS (* : EQUAL CONTRIBUTION)

Conference

Contribution

- HyperCLOVA X 8B Omni**
NAVER Cloud HyperCLOVA X Team - Contributor
Technical Report, 2026

WORK EXPERIENCE

Residency Program, NAVER Cloud

Oct. 2025 ~ Jul. 2026

- Constructed distillation-based synthetic SFT data to enhance reasoning, and designed a safety evaluation framework assessing LRM reasoning trajectories.

NLP Research Engineer, Twigfarm

Oct. 2022 ~ Feb. 2023

- Developed an image-guided machine translation (IMT) pipeline for Korean–Japanese webtoon translation and constructed a parallel dataset for video-guided machine translation (VMT).

Data Analyst Intern, UpennSolution

Feb. 2021 ~ Jul. 2021

- Conducted quantitative analysis on real-world data to extract insights into social phenomena.

RESEARCH PROJECTS

Clinical Information Extraction

Oct. 2025 ~ Feb. 2026

Research Collaboration with Seoul National University Bundang Hospital

- Constructed an LLM-based pipeline that extracts and structures key clinical information from epilepsy patient notes, ensuring robustness to heterogeneous physician documentation styles.

Legal RAG System

Mar. 2025 ~ Aug. 2025

Research Collaboration with Naedam C&C

- Constructed a legal retrieval corpus and an evaluation QA dataset for Korean fire safety law, and developed a domain-specific RAG system validated on this benchmark.

Face Blur Estimation

Jul. 2022 ~ Sep. 2022

Research Collaboration with Alchera

- Developed and evaluated a regression model estimating blur levels in facial images to filter motion-blurred inputs for reliable face recognition.

PATENTS

Method and Apparatus for Adaptive Injection Decoding to Prevent Incomplete Reasoning in Large Language Models

Patent No. 10-2025-0165083, South Korea (Patent Pending)

AWARDS AND HONORS

Fellowships/Scholarships

Support for Next-Generation Researchers Program – Ministry of Education, South Korea

2024 ~ 2025

Merit-based Scholarship – Seoul National University

2024

Jilli Scholarship (Merit-based Scholarship) – Yonsei University

2018, 2020

Awards

Honors (Top 10% in the College of Social Science) – Yonsei University

2018, 2020
